

May 30th 2005

RoHS-directive confirmation

with this letter we inform you, that since April 2005 all our products are fully RoHS-compliant.

We still have stock of non lead-free series CS, CN, CK, BN and BK, which will be used up.

The series BP and MELF do not contain as before any hazardous materials listed within the RoHS.

All our products are fully capable to stand the higher temperatures during the soldering process.

With best regards

electronic sensor + resistor GmbH

i. A. Martin Lechner
